

# Core Metrics Reporting Categories

Grand Challenges Canada®  
Grands Défis Canada

Development	
1	Availability of situation analysis and report <i>(including knowledge or innovation gap, plus barriers to implementation)</i>
2	Availability of innovation product / protocol / manual
3	MOU or project agreement document signed with partner/s
4	Enumeration of (non-GCC) financial, human and other resources allocated by key stakeholders to innovation development and implementation

Delivery	
5	Number of mental health care providers trained  Knowledge, attitudes and practices of providers <i>(pre- and post-training score)</i>
6	Continuous quality improvement mechanism in place <i>(e.g. regular supervision)</i>
7	Proportion of people in target population screened / identified
8	Expected time and cost for recipients to access innovation <i>(travel time, transport cost and any fees paid out of pocket)</i>
9	Expected proportion of target population with access to innovation medium <i>(e.g. TV, radio, internet)</i>
10	Number of people in target population receiving innovation <i>(disaggregated by diagnosis, level of care, year of project etc.)</i> Satisfaction ratings of persons receiving innovation

Evaluation	
11	Symptom severity score / effect size <i>(e.g. PHQ-9; SRQ)</i> Functioning score / effect size <i>(e.g. WHODAS, WHOQOL)</i>
12	Mental health & well-being score / effect size <i>(e.g. "WHO-5" index)</i>
13	Change in public perceptions, knowledge and attitudes about MNS disorders <i>(KAP score or discrimination / stigma measure; e.g. DISC-10)</i>
14	Cost-effectiveness <i>(cost per unit improvement in symptom severity / function)</i>

Scale up	
15	Allocation of financial, human and other resources by key stakeholders for innovation scale-up
16	Mental health system profile, based on key global mental health indicators <i>(including mental health policy and financial commitment, HR capacity, management and information systems, service infrastructure, etc.)</i>
17	Number of health facilities or providers using the innovation
18	Proportion of people in target population who are seen and/or receiving innovation as intended <i>(disaggregated by socioeconomic group)</i>

Context	
19	Change in public perceptions, knowledge and attitudes about MNS disorders <i>(KAP score or discrimination / stigma measure; e.g. DISC-10)</i>
20	Frequency of contacts with key stakeholders <i>(e.g. meetings, conference calls)</i>
21	List of identified strategies for overcoming barriers to innovation implementation or scale-up <i>(based on situational analysis and/or mental health system profile)</i>
22	Findings from formative research /needs assessment related to local context
