GACD Project Library guide

Fields (columns) in the GACD Project Library

Field (column) in GACD Project Library	Description and options	
Project ID + title	This is the allocated GACD project ID and full project title.	
Research Programme	This is the umbrella GACD Research Programme under which you were funded.	
Funding agency	This is the GACD Associate Member who is the formal funding agency. Some projects may be co-funded by more than one funding agency.	
Project website	If you have told us about your project website, it will appear here.	
Start year	This is the year your project officially started. *Note: projects are ordered by start year, from most recent.*	
End year	This is the year your project ended or the year it is estimated to end.	
Countries (implementation)	These are the countries in which your project is being implemented.	
Countries (admin)	These are the countries from which your project is administrated.	
Aims	These are the core aims your project seeks to achieve.	
Target population	This is the population your project targets.	
Evidence-based intervention	This is the evidence-based intervention that your project seeks to implement.	
Non-communicable disease	This is the NCD which your project seeks to address. Some projects may have more than one target NCD, or not have a specific target NCD.	
♥CVD_WHO intvn	These are WHO-recommended interventions for cardiovascular diseases being implemented by your project, if any.	*GACD is interested in determining where projects align with the recommended interventions in the WHO Global NCD Action Plan.* *The list of interventions for each disease area is taken from the Updated Appendix 3 of the WHO Global NCD action plan 2013–2030 and the WHO Menu of Cost Effective Interventions for Mental Health.*
DM_WHO intvn	These are WHO-recommended interventions for diabetes being implemented by your project, if any.	
LD_WHO intvn	These are WHO-recommended interventions for lung diseases being implemented by your project, if any.	
Cancer_WHO intvn	These are WHO-recommended interventions for cancer being implemented by your project, if any.	
MH_WHO intvn	These are WHO-recommended interventions for mental health being implemented by your project, if any.	
Risk factors	These are the risk factors your project seeks to address, if any. *Note: The full list is in the annex for reference and is derived from past annual project updates.*	
Tobacco_WHO intvn	These are WHO-recommended interventions for tobacco being implemented by your project, if any.	*GACD is interested in determining where*

🍷Alc_WHO intvn	These are WHO-recommended interventions for alcohol being implemented by your project, if any.	*projects align with the recommended interventions in the WHO Global NCD Action Plan.*
🍏Diet_WHO intvn	These are WHO-recommended interventions for diet being implemented by your project, if any.	*The list of interventions for each disease area is taken from the Updated Appendix 3 of the WHO Global NCD action plan 2013–2030.*
🚲Phys Act_WHO intvn	These are WHO-recommended interventions for physical (in)activity being implemented by your project, if any.	
Stakeholders	These are the stakeholder groups engaged as part of your project. *Note: The full list is in the annex for reference and is derived from past annual project updates.*	
Theories, models, frameworks	These are the implementation science theories, models, and frameworks you are applying in your project. *The full list is in the annex for reference and is derived from past annual project updates.*	
Progress update	This is your project's most recent progress update.	
Capacity development	These are the activities undertaken within your project team to develop implementation research capacity. *Note: The full list is in the annex for reference and is derived from past annual project updates.*	
Engaging with pol proc	This indicates if your project team engaged with policymakers or sought to influence the local or national policy process. Examples might include a local or national health forum, an international steering group on health, or working with your local WHO office.	
Engaging with pol proc – timing	When engagement with policymakers took place.	
Engaging with pol proc – details	These are examples of how your team has engaged with the policy process in relation to your GACD project. For example, how you engaged with policymakers, who you engaged with, and details of any specific activities (e.g., when they took place, the aims, and outcomes).	
Project impact	This indicates the impact of the project to date and is in the form of a checklist.	
Project impact – details	This reports the details of how the project generated impact.	*These fields are included in the Impact Update Form sent to projects that have completed.*
Big picture message	This is a succinct 'big picture message' from the project. For example, a significant change in policy or practice because of your project, the most interesting findings, a significant advance in the field to which you have contributed, or something else.	

Navigating the GACD Project Library

The GACD Project Library is hosted on Airtable, which functions a bit like an interactive spreadsheet. A few of the helpful functions are shown below.

⚠️ You do **not** need to log in or sign up to Airtable to view the GACD Project Library.

⚠️ The GACD Project Library is **view only**.

The rows are records, and each record is an individual GACD projects (red). The columns are different fields of content (yellow), such as the year the project started or countries in which it is operating.

Hovering your cursor over the far left of a record will show a circular icon with two arrows. Click on this to expand the record and see all information pertaining to one GACD project.
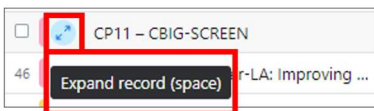

The main function buttons are across the top ribbon:

Applying any of these functions is fully reversible and will only be seen by you.

1. **Search** for specific terms across the whole GACD Project Library.

2. **Hide fields** (columns) you are not interested in by moving the toggles.
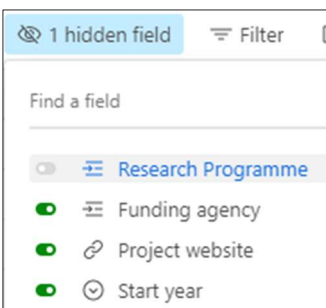

3. **Filter** what you see based on different fields and terms.

In this view, show records

| Where | Start year ⌄ | is ⌄ | Select an option ⌄ | 🗑 ⠿ |

+ Add condition   + Add condition group ⓘ

4. **Group** the records based on different criteria. For example, by Research Programme or Funding agency.

5. **Sort** the records based on a specified field. For example, the start year of all projects.

6. Decide how much information you see for each project by adjusting the **row height**.

Select a row height

≡I Short

≡I Medium

⊐I Tall

⊐I Extra Tall

Annex – Drop-down lists for specific fields in the GACD Project Library

Field: Risk factors

Our project does not focus on NCD risk factors

Absolute cardiovascular disease risk

Air pollution - ambient

Air pollution - cook stoves

Air pollution - secondhand tobacco smoke

Anxiety

Cancer

Child growth

Depression

Diabetes

Diet and nutrition

Dysfunctional parenting practices

Family violence

Fetel growth

Frailty

Harmful use of alcohol

Historic, contemporary, and cultural risk factors in Indigenous peoples

HPV infection (or risk of)

Hyperglycaemia or impaired glucose tolerance

Hyperlipidaemia

Hypertension

Illicit substance use

Mental health and wellbeing

Mood disorders

Overweight and obesity

Pesticide exposure

Physical (in)activity or sedentary behaviours

Precancerous cervical lesions

Sleep

Social support

Socioeconomic disadvantage

Stigma

Stress

Suicide attempt(s)

Tobacco use (smoking or chewing)

Use of carcinogenic medicines and chemicals

Other (please specify)

Field: Stakeholders

Advocates or advocacy organisations

Civil society organisations

Community groups

Community health workers

Community leaders

Family and/or carers of service users

Farmers' associations

Financiers (e.g. National Health Insurance providers)

Food industry representatives

Healthcare professionals

Indigenous leaders

Indigenous organisations

International development organisations

Journalists

Local health authorities

Local policymakers

Manufacturers

National policymakers

Non-government organisations

Other academic institutions and researchers

Peer support workers

Professional organisations

Programme managers

Public health managers

Religious leaders

Retailers (food and other)

Scientific community

Service users

Students

Teachers and other school staff

Tribal Group representatives

Other (please specify)

Field: Theories, models, and frameworks

Acceptance and Commitment to Empowerment Model

Action, Actor, Context, Target, Time [AACTT] framework

Adaptation Framework

Analytical framework for comprehensive evaluation of the intervention to improve early diagnosis of cancer

Behaviour Change Theory

COM-B

Consolidated Framework for Implementation Research (CFIR)

Contact Based Education

Cost of Implementing New Strategies (COINS)

Data Triangulation

Diffusion of Innovations in Service Organizations

Diffusion of Innovations Model

Discrete Choice Experiment

Dynamic Adaptation Process

Ecological Validity Framework

Economic Analysis

Exploration, Preparation, Implementation, Sustainment (EPIS) Framework

Framework to Assess the Impact of Translational health research (FAIT)

GIS Analysis

Health Action Process Approach

Health Belief Model

Health Equity Implementation Framework (HEIF)

IBTN Obesity-Related Behavioral Intervention Trials (ORBIT) Model

IHI Framework for Going to Full Scale

Implementation Fidelity Framework

Implementation Mapping

Implementation Outcomes Framework (IOF)

Implementation Research Logic Model

Integrative Systems Praxis for Implementation Research (INSPIRE)

Intervention Scalability Assessment Tool (ISAT)

Kaupapa Maori

Knowledge to Action Framework

MRC/NIHR Framework for Developing and Evaluating Complex Interventions

Non-adoption, Abandonment, Scaling-up, Dissemination and Sustainability (NASSS)

Normalisation Process Theory

Participatory Citizen Social Science: Our Voice (Discovery Tool)

Phenomenological model for process evaluation

Plan-Do-Study-Act

Practical, Robust Implementation and Sustainability Model (PRISM)

PRECEDE–PROCEED

RE-AIM Framework

Saunders Process Evaluation Framework

Shiffman and Smith 2007 framework for generation of political priority for global health

Socio-Ecological Model

Stages of Implementation Completion (SIC)

Stakeholder Engagement Steps (Shmeer)

The COACH Model

Thematic Analysis

Theoretical Domains Framework

Theoretical Framework of Acceptability

Theory of Change

Two-Row Wampum Model

What Matters Most Theoretical Framework

WHO Conceptual Framework for Scaling Up

WHO ExpandNET Framework

WHO Framework Cycle for Implementation Research

WHO Global strategy to accelerate the elimination of cervical cancer as a public health problem

WHO Nine steps for developing a scaling-up strategy

Workplace health model

Other (please specify)

Field: Research capacity development

PhD studentships integrated into the project

Mentoring within the project team

Informal training activities within the project team

Attending external training activities (e.g., course, webinars)

Attending GACD events (e.g., workshops, schools, masterclasses)

Using the GACD e-Hub

Other (please specify)
