### Reach details
Estimated identification of 15 clients at each facility over the 10-month period after enter the study (n=300). 150 FEP clients from the 10 community mental health centers randomized to the intervention. Discuss with stakeholders, previous formative research documenting gaps in care and interes to address these gaps in care.

### Reach Tools

### Efficacy details
Positive and Negative Syndrome Scale (PANSS), Social and Role Functioning in Psychosis and Schizophrenia (SRFP), Recovery Self-Assessment Scale

### Efficacy Tools
PANSS, SRFP, Recovery Self-Assessment Scale

### Adoption details
1. Four mental health providers per site (n=40). 2. One peer worker per site (n=10). Targeted 10 CMHC to use innovation. Another 10 CMHC will be enrolled as control sites. We expect control sites will introduce the intervention once the project is completed.

### Adoption Tools

### Implementation details
First Episode Psychosis Service Fidelity Scale (FEPS-FS). Evidence-Based Practice Attitude Scale (EBPAS). Recovery Self-Assessment Scale (RSA). Shared Decision Making Questionnaire – Physician Version (SDMQ-Doc). We will use qualitative (ie., focus groups) and quantitative (ie., person-centered scale) to assess clients and families satisfaction. The Service Use and Resources Form and costs related to training staff and implementing OTCH

### Implementation Tools
FEPS-FS. EBPAS, RSA, SDMQ-Doc. We will use qualitative (ie., focus groups) and quantitative (ie., person-centered scale) to assess clients and families satisfaction. The Service Use and Resources Form and costs related to training staff and implementing OTCH

### Maintenance details
150 FEP clients from the 10 community mental health centers randomized to the intervention. Potential changes to FEP Chile Policy to include OTCH at a national or regional level given the new government that will be ruling since March 2018. Positive and Negative Syndrome Scale (PANSS)

### Maintenance Tools
PANSS
